Exams

Show below you’ll find some information and observations about the next exam sessions:

The schedule for the exams will be published soon, even though we are aware that the length of the exam session will be spread in more than one day;

The session of June, July and September 2020 are guaranteed to occur;

Exams will be mostly oral, especially for the courses that have a great number of students enrolled;

The Rector, with Decree n. 253 of April 3rd 2020, has decreed the following: ‘Oral exams occurred in a telematic way and that constitute the only instance to develop evaluation within a judgment process, can be carried out by a single teacher; that in this case will record the audio and/or video of the exam, provided the consensus of the student. The recording will be kept by the teacher for a period not inferior than 6 months’;

The June exam session will certainly occur using telematic means, in the modality explained at the end of this document;

The June exam session is “mainly dedicated” to those that must/want to graduate in July and have any urgent necessity, such as scholarships, merit awards, honor courses, etc. In any case this is a suggestion that requires a direct agreement of students with their teacher. This information will be uploaded by every teacher on the Moodle platform.

The July and September (or August) exam sessions will occur in presence only if the necessary conditions can be respected, according to any ministerial order that will be issued.

It’s important to remember that, even if it will be possible for exam to occur in presence in July, the duration of the session will be lengthened because very few students will be allowed in a classroom at any time (10 to 15 students). This criterion will be valid even for the following exam session (August and September).
MODALITY IN WHICH EXAMS WILL BE CARRIED OUT

In the case in which the exam is oral, either Zoom or Google Meet or another video calling software will be used, in a manner similar to those already implemented for the graduation exams.

For any written exams, instead, this are the modality available as of today

1) The exam will be carried out as a written exam on paper sheets, while the teacher supervises with Zoom or Google Meet; the written exam will be sent to the teacher by the student. This scenario is indicated for exams that include formulas, diagrams, schematics or drawing, and can be implemented starting from the second half of April.

2) The exams will be carried out from a personal computer, through questionnaires with closed or open questions, using the Moodle Platform, that will be so configured:
   2.1 In combination with Zoom or Goole meet or any other software that will allow the teacher to supervise the students.
   2.2 In combination with any other system of supervision from a distance (i.e proctoring) that will supervise the students automatically and that, once the exam is finished, will point out any irregular behavior to the teacher. The teacher will be able to check these irregular behaviors using the recording of a single student.
